ND-100 COMPACT MODELS I, II, III AND IV

Illustrated Parts Catalogue

ND-13.018.01

THE READER

This catalogue is intended for all ND personnel involved in requisitioning parts for maintenance purposes on the ND-100 Compact series.

THE MANUAL

The catalogue is divided into two sections: Illustrated Parts List and Cross Reference List.

ILLUSTRATED PARTS LIST:

This list is divided into five columns as follows:

- ITEM NAME DESCRIPTION: This column provides the descriptive name and main characteristics of the part. The basic name is entered first, followed by subname(s) or colloquial name(s). Colloquial name(s) and description(s) are placed within brackets.
- ARTICLE NUMBER: This column contains the ND article numbers. These should be used when ordering spare parts.
- QUANTITY: This column indicates how many times the described part appears within the assembly.
- STATUS: The letter S in this column indicates that the part will often be needed, and should be kept in stock if possible. The letter R indicates that the part is repairable, and should not be discarded.

CROSS REFERENCE LIST:

This list provides a cross reference between ND article numbers and reference designations. It is sorted by article numbers in ascending order.

ABBREVIATIONS

AC	ALTERNATING CURRENT	M	METER
ASSY	ASSEMBLY	MB	MEGABYTE (OCTAL)
BW	BACKWIRING	MM	MILLIMETER
CCA	CIRCUIT CARD ASSEMBLY (See also PCB)	MMS	MEMORY MANAGEMENT SYTEM
CONN	CONNECTOR	MOS	METAL OXIDE SEMICONDUCTOR
CTRL	CONTROLLER	OP	OPERATOR
CYL	CYLINDER	PCB	PRINTED CIRCUIT BOARD (See also CCA)
CPU	CENTRAL PROCESSING UNIT	POZI	POZIDRIVE
DC	DIRECT CURRENT	PROM	PROGRAMMABLE READ ONLY MEMORY
DISTR	DISTRIBUTION	PS	POWER SUPPLY
ECC	ERROR CORRECTION CODE	RAM	RANDOM ACCES MEMORY
EXCL	EXCLUSIVE	SMD	STORAGE MODULE DRIVE
FL	FLOPPY	SUPA	SUPADRIVE
HD	HEAD	TF	THREAD FORMING
HEX	HEXAGONAL	QTY	QUANTITY
INT	INTERNAL	W/	WITH
KB	KILOBYTE (OCTAL)		

SAFETY PRECAUTIONS

The following safety precautions MUST be obeyed AT ALL TIMES to avoid personal injury and damage to the equipment.

- 1.
 Learn how to apply mouth-to-mouth
 resuscitation, external cardiac massage, and
 other techniques for treatment of electrical
 shock.
- 2.
 Do not work on any equipment until you have attended the ND "Hardware Maintenance and Operation" course, and have studied this manual and all relevant reference manuals.
- EQUIPMENT. If you are the only serviceman on the site, arrange for a second person to be present.

DO NOT WORK ALONE WHEN SERVICING LIVE

- Always leave the equipment in a SAFE condition with ALL covers and panels in place. Use a warning notice to advise that the equipment is under repair.
- 5.
 Obey the instructions in the boxed paragraphs marked WARNING! and CAUTION! throughout this manual and the reference manuals:

WARNING! is used when there is a risk of personal injury,

CAUTION! when there is a risk of danger to the equipment.

WARNING!

The equipment operates from a 115V or 220V mains supply at currents that can cause

3.

DEATH ON CONTACT.

GET FAMILIAR WITH THE MAINS SUPPLY WIRING AND TAKE EXTREME CARE WHEN WORKING NEAR PLACES WHERE THE MAINS VOLTAGE IS EXPOSED. When disassembling a unit, first disconnect it from the mains supply and discharge it. When reassembling, make sure that ALL ground connections are made and that ALL covers/panels are in place before reconnecting the supply.

WARNING!

Remove your wristwatch and all jewellery, including gold rings, before starting to work on the equipment. Rings heat up very rapidly if shorted across a high current supply, and can cause severe burns.

WARNING!

Do not wear any loose clothing (such as a necktie) which can get caught in moving machinery. Long hair may present a similar hazard.

CAUTION!

POWER SUPPLIES: To avoid shorting local power supplies, be sure to keep all conductive objects (e.g. tools and aluminium foils) away from contacts and busbars.

REMOVING PRINTED CARDS: Always use an insulated card extractor when removing cards from live equipment. Note that some cards must NOT be removed when the system is on.

ELECTROSTATIC DISCHARGES: Electronic components may be damaged if subjected to electrostatic discharges through contact with fingers and electrostatically charged object. The danger is particularly high for MOS circuits in a dry environment, but the risk is considerable even with other components and in other climates.

To protect your equipment, always touch a ground cable or grounded part of the machine before handling the cards. Also use as many as possible of the following aids:

- antistatic spray,
- grounded handcuffs (NOT when servicing live equipment),
- conductive tabletops and floormats,
- ionized airblower,
- protective pouches for spare components.

DISK PACK DAMAGE: If you suspect disk pack damage, DO NOT MOVE THE DISK PACK TO ANOTHER DRIVE, as a faulty disk pack will ruin the read/write heads. For the same reason, DO NOT INSERT ANOTHER DISK PACK IN THE SUSPECT DRIVE, as the new disk pack may then be damaged as well.

OVERHEATING: Inspect and service the electrical ventilation equipment regularly, to avoid computer downtime due to ventilation failure. Never place objects on or near ventilation grills.

SEND US YOUR COMMENTS!

Are you frustrated because of unclear information in our manuals? Do you have trouble finding things? Why don't you join the Reader's Club and send us a note? You will receive a membership card - and an answer to your comments.

Please let us know if you:

- find errors
- cannot understand information
- cannot find information
- find needless information.

Do you think we could improve our manuals by rearranging the contents? You could also tell us if you like the manual.

UPDATING

PRINTING RECORD								
PRINTING	NOTES							

Manual name: Manual number: Oate: Manuals can be updated in two ways, new versions and revisions. New versions consist of a completely new manual which replaces the old one. New versions incorporate all revisions since the previous version. Revisions consist of one or more single pages to be merged into the manual by the user, each revised page being listed on the new printing record sent out with the revision. The old printing record should be replaced by the new one.

New versions and revisions are announced in the ND Bulletin and can be ordered from the address below.

The reader's comments form at the back of this manual can be used both to report errors in the manual and to give an evaluation of the manual. Both detailed and general comments are welcome.

These forms, together with all types of inquiry and requests for documentation should be sent to the local ND office, or (in Norway) to:

Norsk Data A.S Documentation Department P.O. Box 25, Bogerud N-0621 Oslo 6 Norway
